

Feature Prioritization

AI-Powered Placement Management Platform

Version: 1.0 | Date: June 3, 2026 | Based on: User Stories v1.0, Stakeholder Analysis v1.0

1. Prioritization Method

Each feature is scored across three dimensions on a 1-5 scale:

- Value** — Impact on user outcomes and business goals (5 = highest)
- Effort** — Development complexity, inverted (5 = least effort / fastest to build)
- Confidence** — Certainty that the requirement is correct and stable (5 = fully validated)

Priority Score = (Value × 2 + Confidence) / Effort

Higher scores indicate high-value, low-effort, well-understood features — ideal candidates for early delivery.

4. Phase-wise Delivery Plan

Phase 1 — Foundation (Weeks 1-6)

Goal: Platform is usable end-to-end for a basic placement drive.

Core features: F-01, F-02, F-05, F-06, F-08, F-09, F-10, F-12, F-15, F-16, F-17, F-19, F-29, F-30, F-34

Deliverables: Students can register and apply. Recruiters can register and post jobs. Coordinators can approve and track via dashboard. Basic notifications in place.

Phase 2 — AI & Automation Layer (Weeks 7-10)

Goal: Add intelligence and remove manual bottlenecks.

Core features: F-07, F-13, F-20, F-21, F-22, F-23, F-24, F-26, F-28, F-31, F-32, F-39, F-42

Deliverables: AI job recommendations live. Auto shortlisting active. Interview scheduling automated. Eligibility rules engine enforcing policy.

Note: F-13 (application lock) depends on F-32 (rule engine) — both must be planned in the same sprint.

Phase 3 — Analytics & Compliance (Weeks 11-13)

Goal: Give administrators the data visibility they need for reporting and accreditation.

Core features: F-11, F-27, F-33, F-35, F-36, F-37, F-38, F-40, F-41

Deliverables: Full analytics dashboards for coordinator, HOD, and admin. Export to PDF/Excel. Audit logs and compliance reporting.

Phase 4 — Polish & Extended Features (Weeks 14-16)

Goal: Performance hardening, accessibility, optional enhancements, UAT, and launch.

Core features: F-03, F-14, F-25, F-43, F-44

Deliverables: SSO integration (if feasible). Calendar OAuth. Placement prediction scores. WCAG 2.1 AA audit. Staging → production.

5. Key Dependency Map

Feature	Depends On	Risk if Not Managed
F-13 (application lock)	F-32 (rule engine)	Lock cannot be enforced without rule engine running
F-07 (AI job matching)	F-05, F-06 (profile + resume)	No profile data = no recommendations

Feature	Depends On	Risk if Not Managed
F-20 (AI shortlisting)	F-17 (job posting), F-05 (student profiles)	Cannot rank candidates without job criteria or profiles
F-25 (calendar integration)	Tech spike: OAuth2 setup	Missing OAuth app registration = feature cannot ship
F-41 (compliance reports)	F-40 (audit logs)	Compliance reports require log data to exist first
F-35 (analytics dashboard)	F-08, F-09, F-12 (applications + offers data)	Dashboard needs real transaction data to be meaningful

6. Story Point Summary

Phase	Total Story Points	Complexity
Phase 1	~89 SP	High (foundation work)
Phase 2	~82 SP	High (AI integration)
Phase 3	~52 SP	Medium
Phase 4	~36 SP	Low-Medium
Total	~259 SP	—

Assumes team velocity of ~35-40 SP per 2-week sprint.

7. Notes & Flagged Risks

- ATS integration is listed as "High severity risk" in the Stakeholder Analysis but is deferred here to the backlog. Recommend reconciling this with stakeholders before sprint planning begins.
- US-015 (notification preferences) is split across Must Have (core notifications) and Could Have (granular config) — ensure the team understands only the basic toggle is in scope for v1.
- A tech spike for Google Calendar / Outlook OAuth2 (F-25) should be scheduled in Phase 1 or early Phase 2 to avoid blocking F-24 (interview scheduling).
- F-41 (compliance/bias reporting) has been added based on the Stakeholder Analysis risk register, even though no user story covers it in the User Stories document. A corresponding

user story should be created before Phase 3 sprint planning.
